PROFESSIONAL SUMMARY

Mechatronics Engineering graduate (2026), GPA 3.124/4.00, with hands-on training in industrial automation, PLC and SCADA systems, control panel building, industrial maintenance, and SolidWorks-based mechanical design. Completed four technical training programs with leading industrial organizations. Effective at analyzing engineering problems, learning new technologies quickly, and collaborating within multidisciplinary teams. Seeking to begin my engineering career in an international or multinational company where I can apply my technical foundation and grow professionally.

EDUCATION

Bachelor of Engineering in Mechatronics Engineering

Graduation: 2026

Delta University for Science and Technology — Faculty of Engineering

- Overall Grade: Very Good | GPA: 3.124 / 4.00

EXPERIENCE

Summer Intern — The Arab Contractors (Osman Ahmed Osman & Co.)

Aug 2025

- Completed a specialized program in construction and management engineering within the Mechatronics department.
- Applied engineering concepts to real industrial operations, including pneumatic and hydraulic systems, and maintenance workflows.
- Achieved an overall program evaluation of Excellent.

Trainee — Tanta Motors (in cooperation with Delta University)

Jul – Aug 2025

- Completed a 30-day hands-on training program across factory production lines and the company maintenance center.
- Gained direct exposure to manufacturing processes and supported engineering teams in daily maintenance operations.

Control Systems Engineering Training — PEPARAB Control Systems

Jul 2025

- Trained in control systems engineering with focus on control panel building and SCADA system fundamentals.

Advanced Training Course — Damietta Container & Cargo Handling Co. (DCHC), Damietta Port

Jul – Aug 2024

- Trained on diesel engine components and troubleshooting of air, fuel, lubrication, and cooling systems.
- Studied PLC and industrial automation control fundamentals, along with inverters, switchgear, port tractor control circuits, and pneumatic and hydraulic systems.

PROJECTS

Graduation Project — ROV (Remotely Operated Vehicle) for Water Quality Inspection

- Designed the complete 3D mechanical model of the ROV using SolidWorks, including part and assembly design.
- Assembled and wired the electrical hardware, including propulsion motors, electronic components, and power connections.

- Installed and connected six water quality and environmental sensors, including pH, Turbidity, Temperature, TDS, Depth, and Leak Detection sensors.
- Conducted system integration, testing, and troubleshooting to ensure reliable underwater operation.

TECHNICAL SKILLS

Automation Systems, PLC Fundamentals, SCADA Fundamentals, Control Systems, Panel Building, SolidWorks, Mechanical Design, Industrial Maintenance, Preventive Maintenance, Electrical Circuits, Industrial Electronics, Electronic Systems, Robotics Fundamentals, Embedded Systems Fundamentals, Pneumatic & Hydraulic Systems, Sensors & Actuators, Manufacturing Processes

SOFT SKILLS

Problem Solving, Analytical Thinking, Effective Communication, Teamwork, Time Management, Task Planning & Scheduling, Deadline-Driven, Adaptability, Flexibility, Self-Confidence, Working Under Pressure, Attention to Detail, Fast Learning

CERTIFICATIONS

SolidWorks Training Course (30 Hours) — Engovation *Aug – Sep 2025*

- Certified by The Egyptian Engineers Syndicate. Overall Grade: Excellent.

C Programming: Language Foundations (DART.IMT.C.02) — edX, Dartmouth IMTx *Mar 2025*

International Engineering Conference on Research & Innovation (IECRI 2022) *Nov 2022*

- Attended as a Listener. Faculty of Engineering, Delta University for Science and Technology.
